PAS 1: Sustainable eating options

Problem: ""I want to make environmentally conscious dining choices, but it's challenging to find restaurants near campus that prioritize sustainability."

Alternatives: "I often end up choosing restaurants based solely on convenience, without considering their environmental impact. It's frustrating not being able to align my values with my eating choices."

Solution: Implement a feature in the app that highlights sustainable dining options for environmentally conscious users.

PAS 2: Restaurant reservations

Problem: "I do not have time to make lines or to wait a lot of time for eating at some restaurants, when restaurants are very crowded, I go to faster places"

Alternatives: "I use to talk to my friends for asking if restaurants are too crowded or which restaurants are the faster option for eating some food"

Solution: Implement an Easy Restaurant Reservations feature in the app, allowing students to quickly and conveniently make reservations at their preferred restaurants directly through the app, ensuring a seamless dining experience without the stress of long wait times.
